Liquid Crystal Pendant #1 **Moldavite + White Spirit Quartz**

QVR Liquid crystal Pendant #1 is good for balancing any aspect of your electrical/energetic system including the Kundalini Chakras. It works on a multidimensional (beyond physical) level cleansing and healing. It is also a bit of a butt kicker as it will make you get on with it!

If you have been procrastinating or being lazy, this pendant will assist with focus and determination to achieve your goals.

Moldavite

Moldavites are rare stones and are among the most powerful gemstone tools for spiritual development and expansion of consciousness. They seem to engender an acceleration of one's inner growth and evolution. Hundreds of times people have described the rapid transformation of their lives which has come soon after they acquired Moldavite. Jobs, relationships, life styles or possessions which did not serve their highest paths were rapidly released, and the new, evolutionary forms of these same things appeared, drawn as if by magnetism. We have heard stories of visionary experience, chakra activation, energy cleansings and the discovery of personal destiny, all associated with the entrance of Moldavite in to one's life.

Moldavite is capable of activating any and all of the chakras, though it most commonly resonates with the heart, third eye and crown chakras. Moldavite's energy tends first to move wherever it is most needed in the physical and etheric bodies, and then to centre in the heart.

QVR Liquid Crystal Pendant #4 Rose Quartz

Rose Quartz

Rose Quartz is the corner-stone for the heart Chakra. Its energy is essential to self-fulfilment and inner peace.

Rose Quartz gently penetrates into the inner chambers of the heart Chakra, where all emotional experiences are recorded and stored. As Rose Quartz witnesses the trauma written therein it empathizes, understands and begins to dissolve the accumulated burdens that suppress the heart's ability to give and receive love.

Rose Quartz is like a wise old woman that knows all of the answers and can heal with a mere glance. As the Rose Quartz energy is sensed, the soul sighs with relief as it intuitively knows that at last the healing has come. This divine Rose Quartz essence begins to circulate energy throughout the heart Chakra, bringing inner nourishment and comfort. As the presence of love is felt, the sorrows, fears and resentments that have constricted the flow of love are replaced with a deep sense of personal fulfilment. This forms the foundation upon which inner peace and contentment become a personal reality.

This pendant is to be worn or placed within the auric field to be of benefit in raising our own vibration and protecting us in a spectacle of light and colour that is impenetrable to lower dark forces.

Wear with confidence when going into situations where your personal wellbeing could be under potential threat or to simply immerse yourself in the healing benefits of the magical geometry of light and colour contained in this vial.

Unity Symbol Pendant

The Unity Symbol Pendant is extremely powerful containing 5 Sacred Geometric symbols: the Egg of Life, Metatrons Cube, the Tree of Life, the Torus and 4 figures of 8. Symbols are the Universal language.

By looking into the image, we become re-acquainted with who and what we are and where we came from. It opens and establishes connections within our brain to expand our awareness and provides tools for healing. It is all about Unity. Accepting the consciousness of Unity and Oneness.

By wearing the Unity Pendant we carry a Universal Portal with us providing connection to source and protection from energies that could disturb our electrical system and being. Wear it with confidence! The 5 symbols that make the Unity Pendant are:

Egg of Life: The Star Tetrahedron. Original 8 cell stage of all life. These initial 8 cells never die, they are the original 8 cells of your body and stay constant in the precise geometric centre of your physical body slightly above the perineum.

The Torus: is like a doughnut continually rotating and turning in on itself. It is the only object that can completely encompass itself, no other shape in existence can do this or anything similar. The Torus appears after many more cell divisions, coming from a 'blob' of consciousness, its insides start turning out, becoming a hollow ball or sphere and then a Torus at 512 cells.

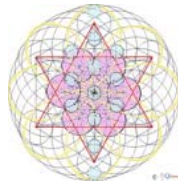

Again, all life goes thru this same Torus procedure, uniting and exemplifying the connectedness of all life, we all have the same origins, both as consciousness and in geometrical form.

The Planet Earth and its Electromagnetic field is a Torus.

Metatrons Cube: Stemming from the Fruit of Life, which is achieved by continuing the circles of the Flower of Life 2 more times to reveal a Hexagonal shape with 13 primary circles or spheres. If you connect the centres of all of these circles (female) with straight lines (male) you end up forming all 5 of the Platonic Solids, the essential geometric building blocks of all organic life. These are the Hexahedron, Tetrahedron, Octahedron, Icosahedron and Dodecahedron.

Tree of Life: is formed out of the Flower of Life. The Tree of Life is the centres of the central 11 circles in the Flower of Life. There are traditionally 10 centres to the Tree of Life but can also be expanded to include 13 centres. These centres relate to the chakra system, musical tones and overtones and to dimensional levels in the universe.

Figure 8: There are 4 figures of 8 in this image. The 8 represents Infinity and Continual Motion. This symbol is on the top and bottom surfaces of a craft located beneath the Sphinx (so I am told!)
